

Yelti Bhavith Reddy

DevOps Engineer — Cloud Computing — System Design

+91-8639662717 | yeltibhavithreddy@gmail.com | linkedin.com/in/yeltibhavithreddy

PROFESSIONAL SUMMARY

Results-driven DevOps Engineer with proven expertise in CI/CD pipeline automation, containerization, and cloud infrastructure. Strong foundation in software development with hands-on experience implementing DevOps best practices at NITCO Inc. Skilled in Docker, Kubernetes, Jenkins, and AWS services with demonstrated ability to optimize deployment workflows and enhance system reliability. Graduated with 8.67 CGPA and multiple industry certifications. Passionate about leveraging cutting-edge technologies to build scalable, high-performance systems.

TECHNICAL SKILLS

Cloud & Infrastructure: AWS (EC2, S3, Lambda, CloudFormation, IAM), Docker, Kubernetes, Linux, System Design
CI/CD & DevOps: Jenkins, GitHub Actions, GitLab CI, SonarQube, Terraform, Ansible
Monitoring & Observability: Prometheus, Grafana, CloudWatch, ELK Stack
Programming & Scripting: Python, Bash, Shell Scripting, YAML, JSON
Web Technologies: REST APIs, Web Services, Microservices Architecture, Fullstack Development
Version Control & Collaboration: Git, GitHub, GitLab, Bitbucket, Agile/Scrum Methodologies

PROFESSIONAL EXPERIENCE

Software Developer
NITCO Inc.

October 2024 – Present
Telangana, India

- Architected and deployed automated CI/CD pipelines using Jenkins and GitHub Actions, reducing deployment time by 40% and enabling continuous integration for multiple microservices
- Containerized legacy applications using Docker, creating optimized multi-stage builds that reduced image sizes by 60% and improved deployment consistency across development, staging, and production environments
- Implemented infrastructure monitoring solution with Prometheus and Grafana, providing real-time visibility into system metrics, application performance, and resource utilization with custom dashboards
- Integrated SonarQube into CI/CD workflows to enforce code quality standards, achieving 95% code coverage and reducing technical debt by identifying and resolving critical vulnerabilities
- Collaborated with cross-functional development teams to streamline software delivery processes, implementing version control best practices and branching strategies that improved team productivity by 30%
- Designed and documented system architecture diagrams and deployment workflows, facilitating knowledge transfer and enabling rapid onboarding of new team members

KEY PROJECTS & ACHIEVEMENTS

Kubernetes-Based Microservices Deployment
DevOps & Cloud Infrastructure

Self-Initiated

- Deployed scalable microservices architecture on Kubernetes cluster with auto-scaling, load balancing, and rolling updates for zero-downtime deployments
- Implemented Helm charts for package management and configured Ingress controllers for efficient traffic routing

AWS Cloud Infrastructure Automation
Infrastructure as Code

Self-Initiated

- Automated AWS infrastructure provisioning using Terraform and CloudFormation, creating reusable modules for VPC, EC2, RDS, and S3 configurations
- Implemented cost optimization strategies resulting in 25% reduction in cloud spending through resource tagging and right-sizing

EDUCATION

Bachelor of Technology
Malla Reddy University

August 2020 – August 2024
CGPA: 8.67/10.0

CERTIFICATIONS & TRAINING

Professional Integration Developer — AWS Academy Machine Learning Foundations
Fullstack Web Development — Data Analysis with Python — Python Fundamentals
